

Structural Insulated Panels are at the core of Ultra-Comfort Hunting Blinds, and it's what makes them the most advanced, and truly unique hunting blind you can buy.

Two seamless aluminum sheets enclose the super insulating foam panel. Three layers laminated together to make one impenetrable barrier to keep out the elements and animals, with you comfortable inside and ready for action.

No wood to rot, no steel to rust! Your Ultra-Comfort Hunting Blind will stand the test of time as well as the ravages of nature.

With our SIP technology, less is way more! Ultra-Comfort Hunting Blinds have three times the insulation value, are three times as strong, yet are only half the weight of the standard commercial hunting blinds. Their unbelievable low weight, only 170 lbs., make them easy to ship and easy to install, even on an elevated platform.

5' Octagon and 6' Octagon Ultra-Comfort Hunting Blinds

- Made from SIP panels (Structural Insulated Panels)
- Insulation will not absorb water (like a Styrofoam cup)
- Solid insulated envelope (no breaks in insulation)
- Three times the insulation value (extra hours of Ultra-Comfort to enjoy the wilderness)
- All aluminum exterior and interior (no wood to rot or steel to rust)
- Totally animal proof and weather proof, inside and out.
- Won't break down after years in the elements like other blinds
- Three times the strength
- Half the weight, only 170 lbs.
- Easy to install on elevated platforms
- Only hunting blind with roof overhang around the entire blind (no water from roof running on walls)
- Silent window operation
- Custom window configuration as per request
- Use for gun, crossbow, or bow
- Soft shooting ledge on all windows
- Taller interior over entire floor plan
- Taller entry door (no ducking to enter)
- Shelf included (to be installed where desired)
- Eight extruded aluminum corners to make octagon layout
- All stainless steel painted fasteners
- Can be shipped in a box at an economical cost

Choose Your Window Style & Placement

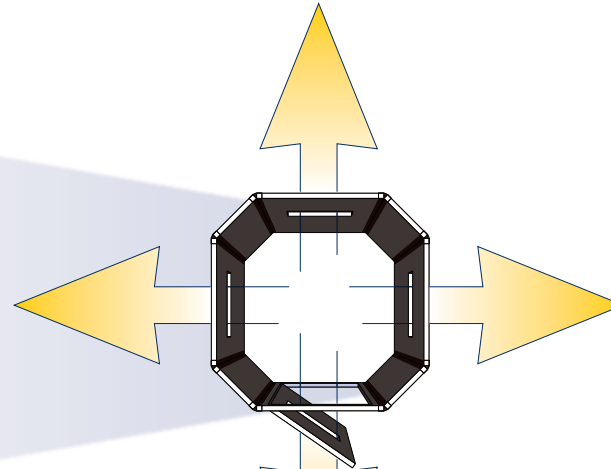

- 1 to 4 horizontal gun and crossbow windows available per blind.
- 1 to 8 vertical bow windows available per blind.

Gun, crossbow, or bow, you'll have all your angles covered!

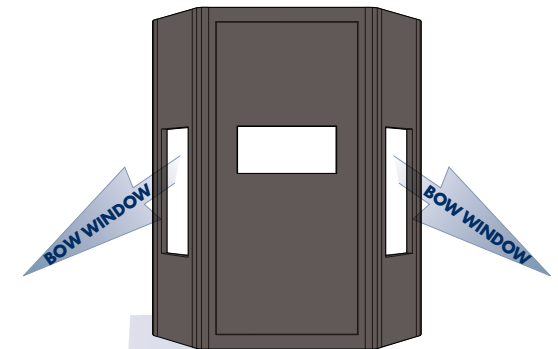

Choose High or Low Window Configuration

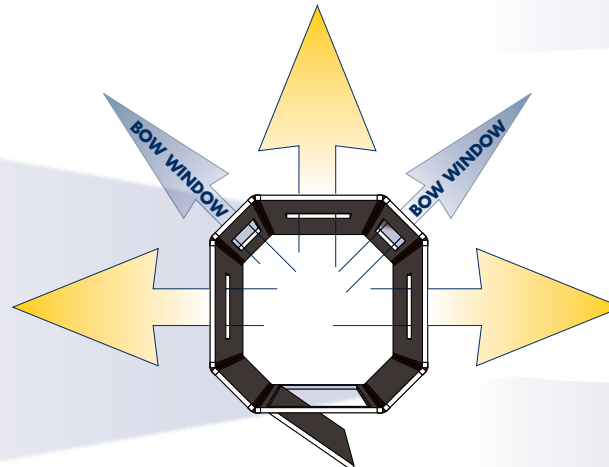

For elevated hunting blinds, install the corner panels rotated so the vertical bow window openings are lower to the floor allowing for a downward angle of attack. Hunting blinds on the ground will benefit from installing the vertical bow window panels rotated so the windows and angle of attack are higher.
