

Structural Insulated Panels are at the core of Ultra-Comfort Hunting Blinds and Coolers. It's what makes them the most advanced yet practical and truly unique hunting blind and cooler you can buy.

Two coated aluminum sheets enclose the continuous super-insulating foam panel giving full metal protection, not just outside, but inside as well. Three layers laminated together to make one impenetrable barrier to keep out the elements and animals. Whether it's you inside your blind or your harvest inside your cooler, you will feel comfortable knowing everything is "just right".

No wood to rot, no steel to rust! Your Ultra-Comfort Hunting Blind and Cooler will stand the test of time as well as the ravages of nature.

With our SIP technology, less is way more! Ultra-Comfort Hunting Blinds have three times the insulation value, are twice as strong, yet are only half the weight of the standard commercial hunting blinds. Their unbelievable low weight (only 190 lbs.) makes them inexpensive to ship, and in their preassembled state, easy to install, especially on an elevated platform.

Choose High or Low Window Configuration

For elevated hunting blinds, install the corner panels rotated so the vertical bow window openings are lower to the floor allowing for a downward angle of attack. Hunting blinds on the ground will benefit from installing the vertical bow window panels rotated so the windows and angle of attack are higher.

- Vertical bow windows can be installed in all panels (except door)
- Larger blinds available - call for info

Heavy Duty Platform Corners

Make an elevated platform in less than 2 hours. Powder coated for long life

Introducing Ultra-Comfort Coolers

We have recently launched a new product - Ultra-Comfort Coolers!
Finally, an affordable way to safely store and age your harvest.

- Cools down to approximately 39° in 20 minutes
- Made from commercial SIP panels - two coated aluminum sheets enclose the continuous super-insulating foam panel
- Hunt when you want - without the worry of waiting for processing or losing your harvest to fly larvae contamination
- Comes complete with all cooling components
- Don't panic - no ice needed
- Aged meat is more tender meat
- Greater air circulation for more precise aging
- Hangs up to 5 deer or 1000 pounds of meat
- 5 stainless steel meat hooks
- Includes exterior thermometer to check interior temperature
- Requires only 110 volts and pulls only 5.9 amps, so it can run on a small generator (not included)
- Includes floor drain for easy sanitary clean up
- Components are shipped preassembled in a box for fast and easy assembly (approximately 2 hours)
- Measures 48"W x 45"D x 90"H
- Weighs approximately 250 lbs
- Hauls with ease in your pickup (no additional trailer necessary)
- Multiple uses after deer season

Portable/Walk-In Meat Hanging Cooler

Our Cooler Is The Most Practical And Affordable Way To Safely Store And Age Your Harvest.
